

Road Diets

Join the Federal Highway Administration and MDOT LTAP Center for a presentation on **Road Diets (Roadway Reconfiguration)** via a live webinar with local discussions on **April 9, 2015** from 1:00 p.m. to 3:00 p.m. **This webinar is "FREE."**

Description – Four-lane undivided highways experience relatively high crash frequencies--especially between high-speed through traffic, left-turning vehicles and other road users. One option for addressing this safety concern is a Road Diet, which typically involves converting an existing four-lane undivided roadway segment to a three-lane segment consisting of two through lanes and a center two-way left-turn lane. This EDC Exchange will highlight how local agencies are using this low cost safety countermeasure to improve safety, operations, and livability in their communities.

Who Should Attend? DOT Construction Engineers, Public Works Directors, Safety Engineers, Transportation Planners, Pedestrian and Bicycle Coordinators, Safe Routes to School Coordinators, Local Public Agency Coordinators, Transportation Alternatives Program Managers, Road Managers and Consultants.

Registration Form (Please Print or Type)

Agency or District Name: _____

Address: _____

City: _____ State: _____ Zip: _____

Phone: _____ Fax: _____

PERSONS YOU ARE REGISTERING TO ATTEND:

(1) Name: _____

Position/Title: _____
